DEMOGRAPHY.

For a brief summary of the results for Tasmania of the censuses of 1921 and 1933, see Tasmanian Pocket Year Book; for fuller information see Census Bulletin No. 14, 1933. For complete details see the census reports of the Commonwealth Bureau of Census and Statistics.

For estimate of mean population of Municipalities in 1935 see page 19.

Reference may be made to the Australian Annual Bulletin of Demography for fuller information for Tasmania in respect to:—

Occupations of fathers.
Birthplaces of persons and occupations of males who died.
Occupations of bridegrooms.

Also for detailed information for Australia, but not for Tasmania separately, in respect to:—

Ages and birthplaces of parents.
Mother's age, showing duration of marriage and previous issue.
Interval between marriage and first birth.
Causes of death of males classified according to occupations.
Duration of marriage, total issue, and average family for persons who died.
Ages, birthplaces, and conjugal condition of persons who married.

THE MEASUREMENT OF POPULATION.

The population of Australia has been counted systematically every 10 years since 1881, but owing to financial stringency the census which ordinarily would have been taken in 1931 was not taken until 30th June, 1933, the results of which are contained in the various Census Bulletins.

At the census, full information as to age, occupation, nationality, &c., is collected. The numbering is carried down to the smallest divisions, details of population and dwellings are shown in Census Bulletin No. 25. Between censuses the only official counting is for whole States, and information as to age, &c., is necessarily incomplete. The inter-censal estimates are made by keeping count of the births and deaths in each State, and of arrivals and departures to and from each State. These estimates are made by the Commonwealth Statistician for the last day of every quarter.

There are, no doubt, errors in the census, but they may be taken as negligible. This is not the case with the inter-censal estimates. The counting of births and deaths is very accurate, but it has been found impossible to get an exact record of migration. Movement across land frontiers of States presents obvious difficulties in counting, but experience has also shown that the estimates of Tasmanian population are liable to substantial error. There is, in general, a number of unrecorded departures, so that any State which is losing population by migration tends to have its population over-estimated.

For any division smaller than States it is impossible to give any trustworthy estimate between censuses. Where growth has been, on a general impression, steady since 1921, a fair estimate may be made, based on past experience and the last quarterly estimate for the whole State. But war broke all continuity in the previous decade, and the later abnormal migration from Tasmania makes any such calculation of little value for any town, municipality, or other division of this State. Under these circumstances, the best source of information is the electoral roll, and the number of electors enrolled, combined with the quarterly estimates for the State, offers a basis for rough estimates of inter-censal populations of parts of this State. The figures for divisions and municipalities given herein are based on the census of 30th June, 1933.

STATISTICAL SUMMARY for TASMANIA, from 1836 to 1935.

YEAR.	Population at End of Year.			Net Migration.		Births.		Deaths.		Natural Increase.		Total Increase.

(*a*) Including shipping population, 253 males and 4 females.
(*b*) Moonah, Derwent Park, and suburban to Humphreys' Rivulet.
(*c*) City boundary to Brown's River.
(*d*) Including Trevallyn, Invermay, Mowbray, Newstead and Lawrence Vale.
(*e*) The Launceston Suburbs include Franklin Village, Youngtown, and St. Leonards which are in the St. Leonards Municipality, together with those portions of adjoining municipalities, St. Leonards, Evandale, Westbury, Lilydale, and Beaconsfield which are definitely suburban in character.

VITAL STATISTICS.

TASMANIA, 1935.

In the following tables births which have occurred in Tasmania since 1920 have been allocated to the districts where the parents were usually resident, and deaths have been referred to the districts which included the usual residence of the deceased. The district rates are consequently true measures of the matters presented, except in so far as a district contains a hospital or infirmary where the inmates are domiciled for extended periods. Prior to 1920 it was customary to record births, deaths, and marriages as pertaining to the district in which the event occurred. The district rates for these earlier years, however, have been adjusted as far as practicable so as to be reasonably comparable with the later results.

In the following review and throughout the tables of this publication, population and migration estimates, as also birth, death, and marriage rates, over the last inter-censal period 1921 to 1933 have been revised in accordance with the results ascertained at the census of 30th June, 1933.

Note.—Figures in parentheses refer to the year 1934, except where otherwise indicated.

INCREASE OF POPULATION.

The estimated population of Tasmania for 1935 was 117,931 males, 115,101 females, 233,032 persons. This shows an increase of 1585 persons, as compared with a loss of 663 persons during 1934. Losses by migration amounted to 518 persons, there being a small increase of 7 in respect of males. The loss by migration was substantially lower than that of 2788 experienced during 1934. The natural increase, or excess of births over deaths, of 2103 (2125) for 1935 is the lowest recorded for Tasmania since 1880. Particulars of natural increase and net migration are set out hereunder:—

Natural Increase (Excess of Births over Deaths).

	Males.	Females.	Persons.
Births registered in 1935	2,245	2,211	4,456
Deaths registered in 1935	1,273	1,080	2,353
Excess of Births	972	1,131	2,103

Net Migration.

	Males.	Females.	Persons.
Arrivals	21,570	20,824	42,394
Departures	21,563	21,349	42,912
Net Migration	+7	—525	—518

BIRTHS.

Births registered during 1935 numbered 4456 (4470), the lowest number for over 50 years. The birth rate for 1935 declined to 19·41 (19·51) births per 1000 persons, the lowest on record, compared with an average of 21·61 births per 1000 persons for the decade prior to 1935.

The birth rate for the urban division of the State improved slightly, increasing to 16·6 (16·2) per 1000 persons. Each of the urban areas, Hobart and suburbs, Launceston and suburbs, and Devonport, experienced improved rates.

For the rural division, the rate declined to 21·5 (22·1) births, the greatest decline being experienced in the South-East Division, where the rate fell to 17·8 (20·8).

The following table comparing town and country rates over an extended period, shows the decline in the birth rate which has been a general experience for many years past:—

Births per 1000 of Population.

	1934.	1935.	1925-34.	1911-20.
Urban districts	16·2	16·6	18·8	26·9 (*a*)
Rural districts	22·1	21·5	24·0	29·7 (*a*)
Tasmania	19·5	19·4	21·6	28·1

(*a*) Approximate.

DEATHS.

The death rate in 1935 at 10·25 (10·23) per 1000 persons was exceptionally high, and was the highest since 1921. The actual number of deaths recorded increased to 2353 (2345), only 6 short of the highest on record for Tasmania (viz., 2359 in 1898, when the corresponding death rate was 14·19 deaths per 1000 persons). The heavy mortality in 1935 compares unfavourably with an average of 9·43 deaths for the decade 1925-34.

A slight improvement in the death rate for rural areas was counteracted by an increase in the rate for the urban division. In the urban division, fairly substantial increases in the rates for Hobart and suburbs, and Devonport were offset by a much improved rate for Launceston and suburbs. The rates for the former rose to 13·0 (12·0), and 11·1 (9·6) deaths per 1000 persons respectively, while that for Launceston and suburbs fell to 10·4 (11·8) deaths. Of the rural districts, which collectively experienced an improved rate of 8·8 (9·0), the rate for the South-East Division fell to 6·5 (8·1) deaths per 1000 persons.

The urban death rate is adversely affected by the inclusion of deaths in the New Town Infirmary and the Consumptive Sanatorium, which properly should be distributed over the State. The rate for the Southern Rural Division is similarly affected by the location of the Mental Diseases Hospital within that division. The figures in the following table represent the results after distributing the deaths in those institutions on a population basis:—

Deaths per 1000 *of Population.*

	1934.	1935.	1925-34.
Urban districts	11·5	11·8	10·8
Rural districts	9·2	9·1	8·5
Tasmania	10·2	10·3	9·4

The incidence of various causes in these results is given below:—

CAUSES OF DEATH.

Diseases of the heart, the principal class of disease causing death accounted for a decreased number of 534 (572) deaths in 1935. Following the general trend of recent years, the number of deaths from cancer, 261 (259), showed an increase. This compares very unfavourably with the average of 213 for the decade 1925-34. Deaths from tuberculosis, contrary to the trend of recent years, increased to 130 (112). This number equals the decennial average. Deaths from influenza showed a small decrease, numbering 50 (62). Of the other principal causes of death, pneumonia and broncho-pneumonia accounted for 207 (194) deaths, nephritis 99 (90), accident or negligence 124 (101), malformations and diseases of early infancy 155 (121).

INFANT MORTALITY.

Infant mortality increased substantially during 1935, the rate rising to 51·8 (42·3) deaths per 1000 births. For many years, the infant mortality rate has tended to decline, and in 1933 reached the low level of 41·1 deaths per 1000 births. As a result, the average for the decade 1925-34 was 49·3 deaths per 1000 births.

Increased rates of mortality were experienced over the whole of Tasmania, excepting Launceston and suburbs, and Devonport, where the rates fell to 44 (62) and 22 (48) deaths per 1000 births respectively. Hobart and suburbs experienced an exceptionally large increase to 72 (42) deaths per 1000 births. The urban division as a whole showed an increased rate of 58 (49) deaths per 1000 births. All the rural areas experienced increased rates of mortality, the highest being shown for the Midland Division, where the rate rose to 75 (18) deaths per 1000 births.

Of the 231 (189) deaths of children under one year registered in 1935, there were 160 (121) under one month, corresponding approximately to deaths from pre-natal causes. Deaths in the subsequent 11 months of age are due commonly to causes of a preventable nature.

The following table gives a comparison of the number of deaths in each of the three chief groups of causes of deaths under one year.

	1934.	1935.	Average. 1925-34.
Diseases of the respiratory system	21	35	29
Diseases of stomach	20	11	23
Pre-natal causes	117	150	146

The difference between town and country with respect to "preventable" infant mortality may be inferred from the following table:—

Infant Deaths Over One Month of Age per 1000 *Births.*

	1934.	1935.	Average. 1925-34.
Urban districts	20	17	19
Rural districts	13	15	14
Tasmania	15·2	15·9	15·6

STILL-BIRTHS.

During 1935, 131 (120) still-births were registered, equivalent to 2·86 (2·61) per cent. of all births. The total of still-births, together with deaths of children under one month of age, was equivalent to 65 (54) per 1000 live births. This represents a high rate of mortality compared with the corresponding proportion of 16 (15) per 1000 live births for deaths over one month and under twelve months of age, where the causes of death are mainly of a preventable nature.

NOTIFIABLE DISEASES.

The number of infectious diseases notified during 1935 was 1032 (1096), an improvement of 64 on that recorded for 1934. The only increases were in respect of diphtheria and typhoid fever, the number of cases of diphtheria numbering 537 (491). Scarlet fever showed the greatest decrease, 302 (362) cases being reported. Minor decreases were shown in respect of tuberculosis, syphilis, and puerperal fever, of which 153 (157), 109 (114), and 7 (15) cases respectively were notified.

The figures for the principal notifiable diseases are as follows:—

	1933.	1934	1935.
Typhoid	37	19	23
Scarlet fever	370	362	302
Diphtheria	706	491	537
Tuberculosis	188	157	153
Syphilis	67	114	109
Puerperal fever	14	15	7

Deaths in Public Hospitals (excepting the New Town Rest Home and the Tasmanian Sanatorium which are in the Hobart District and the Mental Diseases Hospital at New Norfolk) have been referred to the District in which the case originated. Deaths at sea are not included.

NOTE.—In the revised classification of causes of death adopted in 1931, the new classes of diseases formed are only approximately the same as the old classes. In consequence the figures from 1931 shown above are not strictly comparable with those for the previous years.

* Deaths which occurred at sea, or on foreign ships in Tasmanian waters, and were registered in Tasmania, are not included.
† Croup has been included with diphtheria since 1931.
§ Including cerebral apoplexy and arteriosclerosis in association with cerebro-vascular lesion.
‡ These results are the arithmetic means of the rates for each of the five years.

METEOROLOGY.

SYNOPSIS OF THE WEATHER OVER TASMANIA DURING THE YEAR 1935.

The rainfall for 1935 was about normal or slightly below in the northern division but over average elsewhere. The excess was only slight on the West Coast, but amounted to about 25 or 30 per cent. of the average for other divisions.

The outstanding feature of the year was the abnormally wet summer and autumn. Rainfall totals for the three months February to April were the highest on record at most stations over the south-eastern half of the State. At Hobart, where records extend over a period of 93 years, the rainfall was the highest for these particular months since 1854. The three months December 1934—February 1935, were also the wettest on record at a number of eastern and southern stations.

Monthly totals were abnormally high in February and April, February being the wettest on record at many stations, except in the West, and April the wettest on record in most of the south-east quarter and parts of northern agricultural districts. March and May were also rather wet monthsover the western half of the State. Southern districts received over average totals in August, October, and November. September and October were rather dry in the North, as was December in most of the North and West.

NOTES ON FLOODS.

Many floods occurred during the year, of which the following are particulars:—

February 11*th*-12*th*.—Heavy rains in the North-east and East. Some falls of 3″ to 4″ in 24 hours. South Esk River 12′ 9″ above summer level at Fingal. Macquarie River 10′ 9″ at Ross. *February* 16*th*.—South Esk River again 12′ above summer level at Fingal. *April* 9*th*-10*th*.—Heavy rains West Coast. King, Henty, and other rivers in flood. Henty highest for 30 years or more. *April* 15*th*-16*th*.—Heavy rains Eastern Tasmania, 2″ to 4½″ in 24 hours at many stations. *April*, 16*th*-17*th*.—South Esk River 14′ at Fingal. Macquarie River 11′ 2″ at Ross. East Coast roads flooded. Clyde Bridge flooded at Bothwell. River Ouse highest since 1916 at Ouse, West Coast Road covered to a depth of several feet. *April* 19*th*-23*rd*.—Hadspen Bridge several feet under water from 18th to 21st, and again on 22nd (18″). River Jordan over road at Broadmarsh and East Coast Road impassable near Riversdale on 21st. South Esk River 14′ at Fingal on 22nd. *May* 18*th*.—Very heavy rains West Coast (Mt. Lyell 586 points in 48 hours, highest on record). Record flood in King River, 3′ 6″ above railway line at Teepookana Bridge. Huon River overflowed into streets at Huonville for first time in 14 years. Temporary bridge over Derwent at Macquarie Plains, and Florentine River Bridge washed away. West Coast Road flooded in several places. *June* 16*th*.—Heavy rains West Coast, 2″ to 3½″ in 24 hours. King River again over railway at Teepookana. Mackintosh River 40′ high near Tullah, and bridge washed away. Huon River again overflowed. Derwent River highest for about 15 years at New Norfolk. West Coast Road flooded in several places. *July* 19*th*-21*st*.—Heavy rains northern Tasmania, 2″ to 3″ in 24 hours at many stations. Some flooding in northern rivers. River Meander 8′ at Meander. Lake River 7′ at Connorville on 19th. *August* 31*st*.—Heavy rains in northwest, 2″ to 3″ in 24 hours at several stations. Floods in Inglis, Flowerdale, Mersey, and other rivers. *September* 15*th*-16*th*.—Some heavy rains in north-east. South Esk River 10′ above level at Fingal on 16th.

MEAN MONTHLY TEMPERATURES.

Mean temperatures fluctuated considerably from month to month. March, May, and June, and in the east, September were very cool months, means being 1 or 2 degrees below the average. July and August, and in the south and east, April, were on the other hand very mild with an excess of 1 to 2 degrees. January was also cool in the north and midlands.

CROPS, PASTURES, &C.

The year was very unfavourable for agriculture. The heavy rains in the summer and autumn did much damage to grain crops, also to fruit and potatoes. The land also was saturated, and it was not until August or September that ploughing and sowing could be attempted. As a result, a considerably reduced area was put under crop, and such crops as were sown were, in many cases, backward and light. Favourable conditions in the south in the spring resulted in a considerable improvement here. Much damage was done in some localities by unseasonable frosts in October and November, and although early prospects for fruit were favourable, later reports indicated light to medium crops. Stock, however, had a good winter and with plenty of feed and water maintained good condition throughout the year. Some losses of sheep were reported from the midlands in the winter due to wet weather, but the lambing season was very satisfactory, as was also the wool clip.

PRESSURE VARIATIONS.

Mean monthly pressure was below the average in January, March, April, July, and August, but over average in other months. The departure from normal amounted to about one-tenth of an inch in January, April, and September. Depressions were of a combined Southern Ocean-Monsoonal type except in May and June when the winter Southern Ocean type prevailed. Monsoonal influences were weak in July. Depressions and anticyclones developed moderate intensity at times each month, but anticyclones were weak in June, October, and November. Only on two occasions did barometers fall below 29·0 inches (once in March and August), or rise above 30·5 inches (once in June and August).

A feature of the summer and autumn of 1934-35 was the development of marked low pressure activity, resulting in monsoonal depressions or deep cyclonic depressions, over south-eastern Australia and neighbouring ocean areas. The very heavy rains of December 27th-30th, 1934, February 7th-12th, 1935, were the result of persistent monsoonal low pressure activity on the mainland, while those of November 30th-December 1st, 1934, and April 15th-19th, 1935 were associated with deep cyclonic depressions centred over Eastern Bass Strait.

The flood rains on the West Coast in April were associated with a Southern Ocean depression which rapidly increased in intensity over this State, and those of May and June with rather deep "secondaries" which formed over the State. A peculiar feature of these latter developments was that practically no rain fell in the northern and eastern districts.

OTHER FEATURES.

Other features of the weather from month to month were as follows:—Frequent pressure fluctuations occurred in *January* and early in February. Most of January's rain fell in the first week when a cyclonic depression developed over Bass Strait, causing strong southerly winds. High north-westerly winds accompanied a depression on the 19th and some damage was done to fruit and hops in the Derwent Valley. Strong westerlies persisted at intervals during the latter half of the month. Little warm weather was experienced.

In addition to the flood rains mentioned, in *February* heavy falls occurred in southern districts in the first few days in connection with a cyclonic development to the eastward. Unsettled to showery weather followed the downpours of the 7th-12th, but the weather cleared up on the 21st with a period of high pressure. The first week or so was rather cold but some warm days were experienced at the end of the month and in the first ten days of March.

A rather rapid succession of anticyclones and slight depressions early in *March* was succeeded by a spell of low pressure activity from the 14th-24th. Practically all the month's rain fell in this interval. A very deep depression developed on the 22nd and windstorms did some damage in Northern Tasmania. Cold weather was experienced from the 14th-17th and 21st-26th with some snow on the highlands. High barometers and chiefly fine weather followed until 6th April and a few warm days occurred in this interval.

Heavy rains and floods occurred between the 8th and 24th *April* with cool to moderate temperatures and rough westerly followed by southerly weather. The Easter holidays were rather showery in eastern districts, but fine and pleasant in the west. A short interval of finer weather towards the end of the month was succeeded by another cyclonic development to the east of Tasmania, and heavy rains fell in the south-east quarter of the State.

Fine frosty weather was experienced in the first week or so of *May* with high barometers. Two low pressure systems followed, extending over several days in which heavy rains fell in the west and on the 10th in the north. Rough westerly to south-westerly weather was experienced about the middle of the month with cool temperatures. Although barometers were high in the third week the weather was somewhat unsettled with scattered showers. Depressions at the close of the month brought moderate rains and high north-westerly winds.

Well developed anticyclones passed at intervals in *June* with many frosts. Further general rains with some snow on the highlands accompanied depressions on the 15th-16th and 21st, the former being very heavy in western parts of the State. Low pressure activity to the southward caused persistent rainy conditions in the west during the latter part of the month. Periods of cold temperature were experienced, but the last few days were mild.

Unsettled but mild weather continued during most of *July* but frosts occurred with periods of high pressure from the 7th-11th, 22nd-23rd, and 27th-29th. The north received some heavy rains between the 15th and 20th and rough north-westerly to westerly weather was experienced about this time in connection with a period of low pressure activity which commenced on the 12th. Colder temperatures were experienced at times towards the end of the month.

A very intense low pressure system developed over South-Eastern Australia at the beginning of *August*, and fairly general rains were followed by a heavy fall of snow which blocked traffic on the West Coast Road, and caused electric power failures in the north-west. A similar occurrence was experienced on the 15th-16th with the development of a secondary depression. Rough south-westerly weather also resulted from these

developments. The latter part of the month was mainly fine with high barometers. The flood rains in the north-west at the close of the month, were associated with a depression of a combined Monsoonal-Southern Ocean type. Periods of mild weather this month were favourable for rapid growth of herbage. Finer weather prevailed in *September*. Periods of high pressure from the 7th-14th and 25th-28th were accompaniel by cool temperatures and some frosts. Low pressure activity from the 1st-6th, 14th-21st and 29th-30th brought showers at intervals, but registrations were in most cases light. A weak cyclonic development caused some heavy falls in the east on the 14th. Somewhat similar rainfall conditions prevailed in *October* but marked fluctuations in temperature occurred at times. Maximum temperatures of from 75 degrees to over 80 degrees were recorded in the south on the 1st, 8th and 26th, but on several days between the 10th-24th recordings were below 55 degrees. Rapid though slight fluctuations in pressure occurred during most of the month, and high north-westerly to westerly winds were experienced in the first week or so and about the 26th. Unseasonable frosts did some damage on the 19th and 29th. Rather rapid fluctuations of pressure and temperature occurred in *November*. Depressions of moderate intensity brought several fairly general rains with some heavy falls in the north-east and south on the 13th. Rough north-westerly to westerly weather was experienced from the 2nd-4th with a fall of snow on the highlands. An unusual number of thunderstorms occurred between the end of October and middle of December. Rather marked fluctuations in temperature were again recorded from 27th November to 19th *December* with some warm days, but cool weather prevailed during the last fortnight of December in the south and east. Frequent depressions this month brought showers at intervals until the Christmas holidays, but the rainfall was chiefly light in northern districts. A heavy southerly rain in the south-east quarter was associated with a monsoonal development over Eastern Australia on the 20th. Mean temperatures this month were 1 degree or so above the average in the north and west. The year closed with a favourable seasonal outlook, but rain was needed in northern districts for late crops and pastures.

The following is a summary of the Hobart monthly temperature and rainfall for 1935:—

Month.	Mean Temperature.	Normal Temperature.	Rainfall (Inches).	Normal Rainfall (Inches).
January	61·4	61·9	1·05	1·84
February	62·4	62·2	4·96	1·47
March	57·8	59·4	1·56	1·74
April	55·6	55·1	8·50	1·93
May	49·6	50·6	0·87	1·86
June	46·4	46·8	2·42	2·21
July	47·2	45·8	1·25	2·16
August	49·6	48·0	2·08	1·82
September	50·4	51·0	0·79	2·10
October	53·4	54·0	2·58	2·33
November	56·4	57·1	2·91	2·45
December	59·6	60·2	3·25	2·06
Year	54·2	54·3	32·22	23·97

The highest maximum temperature was 90·9 degrees on 9th December, and the lowest minimum 31·9 degrees on 24th June. The highest maximum temperature on record is 105·2 degrees on 30th December, 1897, and the lowest minimum on record is 27·0 degrees on 18th July, 1866.

The rainfall during the year for the various districts, as reported by telegraph, is summarised in the following table:—

District.	Mean District Rainfall, 1935.	Average for Previous Years.	Percentage Departure from Normal.
	in.	in.	
Northern	37·23	38·56	3 % below normal
West Coast	104·20	98·65	6 „ above normal
Central Plateau	42·68	34·31	24 „ „ „
Derwent Valley	26·33	21·35	23 „ „ „
Midlands	26·05	21·78	20 „ „ „
East Coast	39·38	31·29	26 „ „ „
South-East	39·07	29·63	32 „ „ „
King Island	33·60	33·87	1 „ below normal
Flinders Island	33·59	26·30	28 „ above normal

TASMANIAN TRADE.

Twelve Months ended 30th June, 1936.

(Figures in parentheses are those for the corresponding period of 1934-35.)

The figures shown in the following tables represent the values of the trade of Tasmania as compiled from documents presented by the importers and exporters respectively.

The recorded trade of Tasmania for the year 1935-36, of £18,872,800 was the highest reached since 1929-30.

Imports at £9,564,100 (£7,963,600) increased by £1,600,500, or 20·1 per cent., on the figure for 1934-35. Interstate imports, valued at £8,566,800 (£7,226,100), were responsible for 89·6 (90·7) per cent. of the total, while oversea imports accounted for £997,300 (£737,400), or 10·4 (9·3) per cent. of the total.

Exports were valued at £9,308,700 (£8,081,400), an increase of £1,227,300, or 15·2 per cent. Direct oversea imports increased by £592,400, or 27·4 per cent., and were equivalent to 29·6 (26·7) per cent. of the total.

Owing to the rate of foreign exchange operating throughout the year, it is necessary to moderate the values of either imports or exports before the figures are properly comparable. During the year the Australian rate of exchange on London remained at 25 per cent., and oversea imports, valued in sterling at £997,300 must, therefore, be increased to £1,249,100 to indicate a value in exchange against exports.

Compared with the average of the previous five years, the total trade increased by £4,421,800, or 30·6 per cent., imports rising by £2,373,900, or 33·0 per cent., and exports by £2,047,900, or 28·2 per cent.

THE TRADE POSITION.

The following table shows clearly the "visible balance of trade" for the last ten years:—

	Total Trade. £1000	Imports (*b*). £1000.	Exports. £1000.	Excess of Exports. £1000.	Excess of Imports. £1000.	Imports as a Percentage of Exports.
1926-27	18,843	9406	9437	31	....	99·7
1927-28	19,490	9529	9961	432	....	95·7
1928-29	18,998	9235	9763	528	....	94·6
1929-30	18,936	9848	9088	....	760	108·4
1930-31	14,328	7344 (*a*)	6984	....	360	105·2
1931-32	13,726	6683 (*a*)	7043	360	....	94·9
1932-33	13,623	6937 (*a*)	6686	....	251	103·8
1933-34	15,097	7587 (*a*)	7510	....	77	101·0
1934-35	16,229	8148 (*a*)	8081	....	67	100·8
1935-36	19,125	9816 (*a*)	9309	....	507	105·4

(*a*) Value calculated for the purpose of this table. The recorded values were:—1930-31, £7,230,000; 1931-32, £6,534,000; 1932-33, £6,796,000; 1933-34, £7,427,900; 1934-35, £7,963,600; 1935-36, £9,564,100.

(*b*) The recorded figures for oversea imports include an allowance for freight and other charges. This is not so for interstate imports. It is estimated, however, that the freight on the latter approximates £400,000 per annum.

The figures submitted above are those arising from the visible interchange of commodities to which definite values can be given. In Tasmania a more than ordinary amount of the activity of the community is devoted to providing for mainland tourists, a service which has the same effect on the trade balance as an export of goods, though no entry appears in the trade statistics on its account. On the other hand, there are services such as shipping [see note (*b*) above], banking, insurance, &c., which enter into the equation, but which cannot be valued with even a reasonable degree of accuracy.

Subject to these limitations, therefore, there was an excess of exports over imports for the years 1926-27 to 1928-29, the surplus in the latter year reaching the high figure of £528,000. In 1929-30, despite an export of £426,000 of gold in connection with the Australian exchange position, the balance was in favour of imports, the excess amounting to £760,000. Similarly in 1930-31, with gold exports amounting to £120,000, imports were greater by £360,000 after adjusting the values of oversea imports, while for the year 1931-32 a favourable balance of £360,000 was recorded

without the assistance of any accumulated gold in the State's exports. During the past four years the balance has again swung in favour of imports to the extent of £251,000 in 1932-33; £77,000 in 1933-34; £67,000 in 1934-35; and as much as £504,000 in 1935-36.

The increased trade of the State was shared by all ports. The value of trade at Hobart, including its sub-ports on the Huon River and elsewhere, which accounted for nearly half of the total trade of Tasmania, increased from £7,980,200 to £9,355,500, a rise of £1,375,300, or 17·2 per cent. Trade at Launceston increased from £5,082,400 to £5,959,000, a gain of £876,600, or 17·2 per cent. Contributions to the total trade made by the various ports during the last two years, expressed as percentages, were as follow:—Hobart, 49·5 (49·7) per cent.; Launceston, 31·6 (31·7) per cent.; Burnie, 6·5 (6·1) per cent.; Devonport, 4·9 (5·1) per cent.; Strahan, 4·1 (3·8) per cent.; Stanley, 1·2 (1·4) per cent.; Ulverstone, 0·9 (0·9) per cent.; Smithton, 0·6 (0·7) per cent.; and King Island, 0·7 (0·6) per cent.

The figures shown in the following tables include goods transferred to the mainland ports for transhipment to oversea countries, and similarly, interstate imports include goods from oversea countries received through the mainland States.

CHARACTER OF TRADE.

IMPORTS.

(Recorded Values.)

The principal classes of goods imported during the year were:—Metals, metal manufactures and machinery, £2,548,500 (£1,852,100); food and drink (except alcoholic liquors), £1,809,000 (£1,579,200); drapery, clothing, and textiles, £1,591,100 (£1,428,200); stones and minerals, £529,100 (£480,200); tobacco, £439,500 (£397,100); drugs and chemicals, £362,400 (£293,100); animal substances, £295,500 (£198,200); paper and stationery, £292,400 (£283,900); oils, fats, and waxes, £291,600 (£205,400); rubber and leather, £173,600 (£164,000); and alcoholic liquors, £173,000 (£164,700).

The following items were mainly responsible for the increase in the figures for 1935-36 on those for 1934-35—

Motor-cars, £288,100; textiles, drapery, and clothing, other, £187,000; machinery, £178,600 (electrical machinery and appliances, £121,400; machinery and implements, other, £43,700; and motive-power machinery, £13,500); wool, £96,300; iron and steel, £85,200; petrol, £62,400; hardware, £53,100; sugar, £53,100; zinc-ore, £52,800; butter, £52,200; tobacco, £42,300; other chemicals, £41,100; samples, £29,600; wheat, £26,800; drugs, £18,000; copper wire, £16,800; manufactured metals, n.e.i., £16,700; timber, £16,300; lubricating oil, £15,700; explosives, n.e.i., £15,400; railway and tramway materials, £14,700; leather manufactures, £12,000; tea, £12,000; yarns, £11,800; motor-car bodies, £11,300; paints, colours, and varnishes, £10,700; biscuits, £9900; and fertilisers, £9800.

Very few items showed decreases, the main ones being—Boots and shoes, £22,400; coal, £11,000; pipes and tubes, £8400; rubber manufactures, £8000; cartridges, £7800; silver specie, £5200; and sheep, £4800.

The most notable increase in imports was in motor-cars, with a rise of £288,100. Eliminating the tourist traffic, by deducting export figures, the value of motor-car imports increased by £238,400 on the figure for 1934-35.

The following table shows the expenditure on net imports in connection with the motor industry during the last three years:—

	1933-34.	1934-35.	1935-36.
	£	£	£
Net imports of complete cars	157,300	292,100	530,500
Motor-cycles, chassis, bodies, parts, &c.	141,600	177,600	207,000
Petrol	107,900	101,900	164,300
Tyres and tubes	93,800	96,200	87,700
	£500,600	£667,800	£989,500

The class showing the largest increase was Class XII., metals, metal manufactures, and machinery, with a rise of £696,400, mainly on account of larger imports of motor-care, £288,100; machinery and implements, £178,600; iron and steel, £85,200; manufactured metals, n.e.i., £16,700; and many other items to a smaller degree. The classes including food and foodstuffs increased from £1,579,200 in 1934-35 to £1,809,000 in 1935-36, a rise of £229,800, the principal items contributing to this increase being sugar, £53,100; butter, £52,200; wheat, £26,800; and tea, £12,000. Class VIII., clothing, &c., also increased by £162,900; while, with the recovery of wool prices, Class VI., animal substances, showed an increase of £97,300.

EXPORTS.

Exports increased from £8,081,400 in 1934-35 to £9,308,700 in 1935-36, an increase of £1,227,300, or 15·2 per cent.

The principal variations are set out hereunder:—

Increases.—Zinc, £413,300; wool, £333,200; woollen and worsted manufactures, £142,200; copper, £128,500; timber, £98,300; jams and jellies, £65,400; other food and foodstuffs, £62,900; pulped fruits, £57,900; motor-cars and lorries, £49,700; cement, £41,300; butter, £39,600; cadmium, £35,300; metals, other, £33,700; live animals, £26,600; zinc residues, £21,200; hops, £21,000; sheepskins, £17,200; cheese, £15,700; hides and skins, £13,300; limestone, £11,700; tallow, £10,200; preserved fruits, £8600; and potatoes, £6400.

Decreases.—Fresh fruits, £301,000; tin ore, £46,700; peas, unprepared, £18,800; wood manufactures, £16,800; furred skins, £16,000; and fish, £5600.

Mainly on account of the advance in world prices the values of metal exports showed large increases, the most notable being in zinc, which reached the high figure of £1,357,200, representing an increase of £413,300 on the figure for last year. The quantity shipped also increased from 56,700 tons in 1934-35 to 67,300 tons in 1935-36, at an average price per ton of £16 13s. and £20 3s. 4d. respectively. Increases were also shown in copper, £128,500; cadmium, £35,300; metals, other, £33,700; and zinc residues, £21,200.

Wool values appreciated during the year, and a rise of £333,200 was recorded. The number of bales shipped was 44,361, or 6000 more than the previous year. Woollen and worsted manufactures also increased by £142,200.

In recent years the trade in timber has shown a remarkable improvement, and, during the year under review, the quantity exported reached the total of 48,285,900 super. feet, compared with 41,109,500 super. feet in 1934-35, with a corresponding increase in value of £98,300. Shipments of sawn timber increased from 36,604,000 super. feet in 1934-35 to 42,087,000 super. feet in 1935-36, with a corresponding rise in value from £384,300 to £449,600.

Although the quantity of potatoes shipped was 3470 tons less than the previous year, a gain of £6400 was shown in the total value received, the average price per ton rising from £7 16s. in 1934-35 to £8 7s. 6d. in 1935-36.

The reduction in the returns from fresh fruits was solely attributable to the low prices received for oversea apple shipments. Despite the fact that oversea consignments were larger by 339,000 cases than the quantity shipped last year, the average f.o.b. price realised was only 3s. 6d. per bushel, compared with 6s. 5d. per bushel in 1934-35, resulting in a decline in the total value of £301,000. Interstate shipments totalled 1,063,987 bushels, from which the return was £309,900, at an average of 5s. 1d. per bushel.

The export of food and foodstuffs, taken as a class, declined, by £62,700, to £3,101,100. This class represents 33 (39) per cent. of total exports for the year.

H. J. EXLEY, Deputy-Statistician,
Commonwealth Bureau of Census
and Statistics.

Hobart, 5th May, 1937.

IMPORTS AND EXPORTS, YEARS 1913 TO 1935-36.

NOTE.—The figures for the years 1913 to 1921-22 represent Direct Oversea Trade only, because no records of Interstate Trade or Oversea Trade shipped from or to Mainland Ports were made during those years.

† NOTE.—The figures given for each port in the last three tables above do *not* take into account coastal movements of shipping. Ships are recorded as arrivals at the *first* Tasmanian port of call only, and as departures only at the last port of call in Tasmania. A vessel coming direct to Stanley from Melbourne, calling at Burnie, Ulverstone, Devonport, and Launceston, and leaving the latter port for Sydney, would be recorded only as an arrival at Stanley and a departure from Launceston. For total shipping (including coastwise) at each port see page 37.

AGRICULTURE AND LIVESTOCK.

CROPS in 1935-36.

The area under crop in 1935-36 was 242,200 acres, a decrease of 49,800 acres or 17·1 per cent. on the previous year, and 34,370 acres or 12·4 per cent. below the average of the past decennium. The area sown to grain and pulse declined by 25,181 acres, and a decrease of 21,278 acres was recorded for hay.

The decline in the area under cultivation was mainly due to excessive rains in the autumn, which curtailed the sowing of crops. A long spell of dry weather experienced during the growing period affected yields, which in many cases were below normal.

WHEAT.

The area sown to wheat declined by 6260 acres from 16,660 acres in 1934-35 to 10,400 acres in 1935-36, and was 9970 acres less than the average of the last decade. The yield per acre was 17·9 bushels, and production was 186,000 bushels, compared with 307,500 bushels threshed in 1934-35, and 444,550 bushels the average of the last ten seasons.

BARLEY.

The area sown to barley was 5227 acres, a decrease of 552 acres on last year's figure. Production amounted to 92,710 bushels, of which 85,010 bushels were English and 7700 bushels of the Cape variety.

OATS AND HAY.

A decrease of 12,680 acres was shown in the acreage sown to oats. Algerians declining by 8900 acres from 24,970 acres in 1934-35 to 16,070 acres in 1935-36, and Whites by 3780 acres from 11,640 acres to 7860 acres. Fair yields were obtained, and total production amounted to 556,800 bushels, of which Algerians were responsible for 381,000 bushels and Whites 175,800 bushels, compared with the yield of 1,054,000 bushels in 1934-35, and the decennial average of 992,500.

The area sown to hay was 74,740 acres. Production amounted to 96,890 tons, a decrease of 53,190 tons on the output of last year, and 28,350 tons less than the average of the last ten seasons.

PEAS.

The area of peas decreased from 28,200 acres in 1934-35 to 23,690 acres in 1935-36, mainly owing to a drop of 2880 acres in the Blue variety. This area represents a decline of about 1000 acres on the decennial average of 24,680 acres. Yields were below normal, and many crops in the principal pea-growing districts completely failed. The production of Blue peas from the 10,170 acres sown was 126,000 bushels, at an average of 12·4 bushels per acre, and 166,800 bushels from 13,520 acres of Greys, the average being 12·3 bushels per acre. The total yield of 292,800 bushels was over 105,000 bushels less than last year, and 147,700 bushels below the average of the past decennium.

POTATOES.

The area planted under potatoes was 34,720 acres, compared with 36,360 acres in 1934-35, and the decennial average of 36,480 acres. With an average yield of 2·47 tons to the acre, production amounted to 85,800 tons, exceeding the output of 1934-35 by 15,800 tons, but was about 7000 tons below the average of the past decade.

HOPS.

During 1935-36 an increase of 45 acres was shown in the acreage of production hops, but a drop of 17 acres was made in non-bearing hops, giving a net increase of 28 acres on last year's total. During the year under review 2,163,600 lb. were picked from 871 acres, an average of 2484 lb. per acre, compared with 1,831,500 lb. at an average of 2217 lb. per acre in 1934-35.

APPLES.

Owing to the grubbing out of certain obsolete varieties of apple trees, the area devoted to orchards decreased by 400 acres to 33,370 acres, of which apple trees in bearing accounted for 22,970 acres, or 69 per cent. Production amounted to 3,950,000 bushels, representing a slight increase on the output of last year, but a drop of 159,600 bushels on the average of the past decennium. Of this total 2,744,000 bushels were exported to overseas countries and 980,700 bushels to the mainland States. Oversea prices were low, only 3s. 6d. per bushel, f.o.b., being realised. Value at port of shipment was £480,200, compared with £771,800 realised for the previous year's shipments. The value of interstate exports was £311,000, as against £237,000 for the 1,148,000 bushels shipped during 1935-36.

Particulars of production and values during the last five years are as follow:—

1935-36.	Value at Port of Shipment.	Production. Bushels.
	£	
Exports, overseas	2,744,000	523,600 (*a*)
Exports, interstate	981,000	311,100
Used in factories and local consumption	225,000	22,700
Total	3,950,000	857,400 (*a*)
1934-35	3,934,000	1,073,000 (*a*)
1933-34	4,953,000	875,100 (*a*)
1932-33	4,410,000	615,000 (*a*)
1931-32	5,844,000	1,168,000

(*a*) Includes bounty paid in Tasmania, £63,800 in 1932-33, £70,231 in 1933-34, £40,926 in 1934-35, and £43,400 in 1935-36.

LIVESTOCK (at 31st December, 1935.)

HORSES.

The number of horses decreased by 36 to 30,626, compared with 30,662 in 1934.

CATTLE.

Cattle increased by 8447 during the year, and the total now depastured is 270,035. Dairy cows, calves, and working bullocks increased by 12,963, but a decrease of 4516 was recorded in heifers and other cattle.

SHEEP.

The number of sheep increased by 101,450 to 2,139,900, distributed as follows:—

	No.	
Ewes	895,069	42 per cent.
Lambs	545,693	25 per cent.
Other sheep	699,138	33 per cent.
Total	2,139,900	100 per cent.

PIGS.

The number of pigs was 45,163, compared with 40,291 in 1934.

VALUE OF RURAL PRODUCTION.

The net value of rural production in 1935-36 was £3,991,020, compared with £3,693,160 in 1934-35, an increase of £297,860, or 8·1 per cent. Pastoral production, which was responsible for 37 per cent. of the total, increased by £451,320, and dairying, poultry, and bees by £85,990, while a decline of £239,450 was shown in agricultural production.

The net value of production at the farm during the last five years was as follow:—

	£
1931-32	3,433,700
1932-33	2,864,100
1933-34	3,910,320
1934-35	3,693,160
1935-36	3,991,020

Details of these values are shown on pages 7 and 8.

NOTE.—The percentage in the last column is designed to give an approximate measure of the proportion of farming and pastoral land excluding Crown leases and licences, that is rented from the owner. Share farms are left out as being intermediate in their nature. The figure given is the percentage of rented land to the total made up of rented land, freehold occupation and Crown land in process of purchase on time payment.

PRODUCTION: MANUFACTURING—TASMANIA.

YEAR 1935-36.

(Figures in parentheses are those for corresponding period of 1934-35.*)*

For statistical purposes in Australia a factory is an establishment engaged in secondary production, which uses power or employs more than three persons. Certain industries, however, such as construction works (buildings, wharves, bridges, and roads), threshing and slaughtering have never been included in the Australian schedule of manufacturing industries. In the year 1930-31, as the result of a resolution of the Conference of Statisticians, 1930, a new classification of industries was adopted; consequently care is needed when comparing class totals, as the groupings may not now be identically the same as in the years prior to 1930-31.

NUMBER OF FACTORIES.

During the year 1935-36 returns were collected from 925 (926) factories, a decrease of 1 compared with the preceding year.

There were no important changes in individual classes of manufacturing during the year under review.

HANDS EMPLOYED.

The number of workers employed in factories on an average for the year 1935-36, 11,589 (10,555), showed a considerable increase on the number in the previous year, and was the greatest since 1926-27, when the number of workers was 11,694. The increase in workers during 1935-36 was not confined solely to males, there being an increase of 890 males and 144 females.

Some of the more important increases in total numbers of workers are shown in the following industries:—Metal extraction, 1187 (1076); motor and cycle works 549 (447); wool, worsted, &c., 1534 (1377); jam, canning, and pickles, 655 (533); and general printing and binding, envelopes, paper boxes, &c., 475 (303).

The following table gives a classification of hands employed according to the size of the factory in which they work:—

PERCENTAGE OF WORKERS IN FACTORIES.

Classification of Factory.	Tasmania.					Australia.
	1913.	1920.	1933-34.	1934-35.	1935-36.	1934-35.
1- 20 workers	38	32	41	42	38	25
21- 50 workers	21	26	15	13	15	17
51-100 workers	10	23	8	9	12	14
101 and over	31	19	36	36	35	44
Totals	100	100	100	100	100	100

Factories having not more than 20 hands employed a smaller proportion of workers during 1935-36, the percentage of all workers being 38 (42). The percentage of all workers in factories employing between 20 and 50 hands and those employing between 50 and 100 hands increased to 15 (13) and 12 (9) respectively, while in factories with over 100 hands the percentage decreased to 35 (36). The average number of hands in the latter class of factory increased from 321 in 1934-35 to 346 in 1935-36.

The average number of workers for all factories in Tasmania during 1935-36 was 13·9, compared with 12·7 in 1934-35.

OUTPUT AND PRODUCTION.

The consideration of the activities of various industries requires differentiation between "value of output" or the gross value of goods delivered from the factory, and "value of production," or "net production," which is the value added to raw materials used in the factory in the process of manufacture. To obtain the actual value of the wealth so produced by factory processes the costs of manufacture must be as far as possible deducted from the value of output. Such costs are the value of raw materials used; wrappers and containers, the cost of fuel, power, light, water, and other stores; tools replaced and repairs to plant; and depreciation. Wages, in relation to industry as a whole, are reckoned, not as a cost of manufacture, but as the share

of the value of production accruing to labour from its co-operation with capital. At present, also, no deduction is made for depreciation owing to the impossibility of obtaining completely accurate and consistent figures.

The following table sets out the allotment of the gross value of output between these items for the last five years:—

	1931-32.	1932-33.	1933-34.	1934-35.	1935-36.
	£	£	£	£	£
Output	6,423,177	6,563,083	6,786,409	7,223,124	8,853,882
Raw material	2,808,890	2,894,489	2,911,737	3,129,850	3,629,962
All other costs (excluding wages and depreciation)	805,904	789,157	824,821	935,128	1,157,060
Net production	2,808,383	2,879,437	3,049,851	3,158,146	4,066,860
Labour cost	1,522,931	1,524,947	1,584,385	1,717,243	1,979,510
Unallotted balance	1,285,452	1,354,490	1,465,466	1,440,903	2,087,350
	%	%	%	%	%
Labour cost per cent. of net production	54·2	53·0	51·9	54·4	48·7
	£	£	£	£	£
Net production per £100 labour cost	184	189	192	184	205

The gross output for 1935-36 amounted to £8,854,000 (£7,223,000), and net production to £4,067,000 (£3,158,000). After deducting labour costs from net production, an "unallotted balance" of £2,087,000 (£1,441,000) remained for distribution among overhead charges and profits, together with an allowance for depreciation. Net production, which gives the best indication of the activities of the factories of the State, had for a number of years been valued at about £3,600,000, but with the onset of the business depression the values declined in 1931-32 to approximately £2,808,000, but increased in subsequent years to £4,067,000 during the year under review. When reckoned in relation to labour cost, however, net production has grown consistently since 1931-32. For each £100 expended in salaries and wages, the average value of net production rose to £192 in 1933-34, and declined to £184 in 1934-35, but reached the record figure of £205 in 1935-36. The aggregate cost of raw materials rose considerably during 1935-36, and amounted to £3,630,000 (£3,130,000), representing 41 (43) per cent. of the total output. The amount paid in salaries and wages during 1935-36 was £1,980,000, compared with £1,717,000 in 1934-35.

The following figures show the trend during recent years of net production in the chief industries:—

Industry.	Net Production.					Net Production per £100 of Labour Cost.
	1931-32.	1932-33.	1933-34.	1934-35.	1935-36.	1935-36.

Biscuits, confectionery, &c.	170,489	183,837	191,914	203,699	230,292	134
Jam-pulp, &c.	152,693	162,612	137,405	146,896	118,126	96
Woollen mills	367,895	398,716	388,629	274,226	465,191	212
Books, printing, &c.	189,535	184,857	201,279	212,827	308,158	202
Cycle and motor works	76,831	74,226	79,733	86,884	115,788	134
Heat, light, and power (excluding carbide)	338,681	324,847	357,066	440,272	525,488	1060

(*a*) Including carbide. (*b*) Including engineering (not marine or electrical).

As may be seen from the table, net production in 1935-36 was greater than in the previous year in practically all the main classes of manufacturing, with the exception of lime, cement, &c., and jam-pulp, &c. The most important increases occurred in sawmills, £294,981 (£242,207); metal extraction, £839,880 (£456,746); woollen mills, £465,191 (£274,226); and books, printing, &c., £308,158 (£212,827).

COST OF MANUFACTURE.

Raw materials were greater in cost in every industry mentioned in the previous table of net production, except woollen mills, whose raw materials cost £408,467 in 1935-36, compared with £433,355 in 1934-35.

LABOUR COSTS.

The total amount of wages and salaries for the year 1935-36 was £1,979,510, compared with £1,717,243 in 1934-35.

The average payment for the year to all workers, both male and female, rose to £171, compared with £163 in 1934-35; £162 in £1933-34; £165 in 1932-33; and £169 in 1931-32.

FIXED CAPITAL.

At the end of 1935-36 the value of fixed capital investments stood at £8,667,000, slightly lower than at the end of the previous year, £8,764,000. Of this fixed capital, £2,676,000 (£2,695,000) was represented by land and buildings, and £5,991,000 (£6,069,000) by plant and machinery.

POWER USED.

The aggregate horsepower used in all industries in Tasmania during 1935-36 was 165,887 (162,548). A deduction must be made from this total owing to the duplication of 70,836 horsepower due to the inclusion of electric power generated by other forces. The net horsepower used was, therefore, 95,051 (99,754).

Sales Tax (*b*)	71,804	165,052	169,996	(*f*)175,287	(*f*)145,759	(*f*)176,183
Customs (*b*)	173,013	223,487	248,458	248,955	286,698	343,724
Excise (*b*)	119,809	109,595	106,348	111,275	123,797	145,688
Total	606,168	741,912	688,610	695,378	700,654	793,450
Customs and Excise (*c*)	795,000	803,000	934,000	967,000	1,037,000	1,133,000
Sales Tax (*d*)	98,000	238,000	265,000	(*f*) 281,000	(*f*)256,000	(*f*)290,000
Estimated Grand Total (*e*)	1,134,542	1,284,778	1,362,808	1,407,861	1,437,400	1,550,855

(*a*) Collections at the Central Office (which for the whole of Australia amount to approximately one-third of the total) are not included.
(*b*) Actual Collections in Tasmania. The amount of duty collected in other Australian States on goods transhipped to Tamanila not included.
(*c*) Figures based on the assumption that the Customs and Excise Revenue per head in Tasmania, from 1913 onwards, bore the same proportion to the Customs and Excise Revenue per head for Australia that it did on the average for the nine years 1901 to 1909, for which years only full information is available. (The average per head, 1901 to 1909, in Tasmania was approximately 82% of the average per head for Australia. Later years has been taken as approximately 80%.
(*d*) Assuming similar proportion of Collections per capita as for Customs and Excise.
(*e*) Excluding Central Office Collections of Income, &c., Taxes.
(*f*) Including Flour Tax.

CONSOLIDATED REVENUE, 1930-31 TO 1935-36.

(*a*) Including Special Grants (Commonwealth) and Expenditure therefrom.

ACCUMULATED DEFICIENCY TO 30TH JUNE, 1936.

The figures in the above table do not provide a complete record of the Accumulated Deficiency in the State's finances, owing to the practice of debiting Suspense Accounts with Revenue Charges. The following additional amounts should be added to the deficiency prior to 1934-35, as shown above, to arrive at the aggregate position:—

Accumulated Deficiency at 30th June, 1936.

	£
Deficit as shown in above table	1,594,566
Losses on Returned Soldier Settlement	638,600
Loss on realisation of State Ships	61,260
Losses on Marrawah Tram	83,134
Hydro-Electric Depreciation Deficiency	47,211
Railway Renewals Deficiency	20,470
Other	34,857
Total	£2,480,098

NOTE.—The above sum excludes suspended sinking funds and the non-provision of depreciation for replacement of certain capital assets of the State.

GOVERNMENT EXPENDITURE ON PUBLIC WORKS, 1935-36.

(*a*) Including periodic payments in reduction of principal.
(*b*) Much of the debt of Local Government Bodies is in the form of Instalment Debentures, which means a fixed periodic payment on account of interest and principal. For each debt, therefore, the payment on account of interest decreases and the payments on account of principal increases from year to year. These figures indicate the liability as at 30/6/36.
(*c*) Interest in arrear, £1720.
(*d*) Loan payments in arrear, £800.

MARINE BOARD LOANS (1935-36).

FRIENDLY SOCIETIES.

REPORT OF THE STATISTICIAN FOR THE YEAR 1935.

Hobart, 8th September, 1936.

SIR,

In accordance with Section 10 of the Friendly Societies Act, 1888, I have the honour to make the following report with respect to the year 1935.

(Note.—Figures in parentheses refer to the previous year—1934.)

Returns and Information.

District secretaries and secretaries of the larger lodges, together with all other persons who applied for them, were supplied with copies of the printed report and tables for 1934, showing the strength, progress, and financial position of the societies.

The returns relating to the year 1935 were examined as customary for compliance or otherwise with the Friendly Societies Act and the registered rules of each society. The result was pleasing, inasmuch as fewer irregularities were disclosed than formerly in the conduct of financial transactions. A conspicuous feature of past years has been the incorrect allocation of members' contributions between the various funds, but in 1935 offences in this respect were comparatively few in number, and generally of a minor character. Considerable improvement is desirable, however, with regard to the allocation of interest received from investments. Although specific instructions are issued to secretaries each year stressing the need for correct apportionment of interest earnings between funds, the treatment of interest received in 1935 formed the most unsatisfactory feature of the returns. In numerous instances the apportionments resulted in an excessive proportion of interest in the management funds, and it was accordingly necessary to require the secretaries responsible to make an appropriate transfer to their benefit funds. The tendency for secretaries to offend in this direction is aggravated by the fact that the discrepancies are not always apparent on the face of the return, so that they are the more likely to pass without correction.

The inconsistencies referred to above, as well as many others, should have been discovered in the course of the annual audit, which is compulsory under the Act. The fact that these offences invariably involve a shortage in the funds available for benefit purposes, and that they are regularly passed each year as correct by the auditors, should make apparent the urgency for improvement in the system of auditing. In some societies the annual audit of lodge accounts is performed or supervised by the district secretary, with satisfactory results, but mostly the branches are responsible for their own audit. Experience has proved that the local auditors appointed in these cases are generally not qualified for the work, and their audit consequently is of no value. The need for managements to give greater attention to this unsatisfactory feature has been repeatedly stressed, but as yet the societies affected have taken little action to provide the necessary safeguard for their funds.

Societies.

At the end of the year 1935 there were 19 (19) distinct friendly societies, exclusive of two dispensaries in Tasmania. The special societies, which consist of members of one firm or institution or of residents of one locality, and have no branches, numbered 6 (6), with a benefit membership of 9·3 (8·8) per cent. of all societies. There were 13 (13) ordinary societies with 156 (158) branches for males, 27 (20) for females, and 9 (8) for juveniles. During the year 7 branches of the U.A.O.D for females were in operation for the first time, with a benefit membership of 207.

Membership.

The total membership at the end of the year 1935 was 24,584 (24,231), which comprised 22,231 (22,086) in adult male lodges, 1863 (1682) in adult female lodges, and 490 (463) juveniles, showing an increase of 353 benefit members, while a very pleasing feature was an increase of 613 financial members.

The number of initiations in ordinary societies during 1935 showed a pronounced increase. These numbered 1055 (802) in male lodges and 368 (175) in female lodges.

The total departures of the U.A.O.D. shown on page 14 are grossly exaggerated in 1935, owing to one secretary continuing to keep on the books 120 unfinancial members who were out of the Order for many years.

The average age of male members again showed an increase, and has been caused principally by the shortage of new members at young ages.

The following table shows the increase of the average age of adult male members of ordinary societies from the year 1921 to 1935:—

Year.	Average Age.	Year.	Average Age.	Year.	Average Age.
1921	37·8	1926	39·8	1931	41·6
1922	38·6	1927	40·1	1932	42·4
1923	39·2	1928	40·2	1933	42·5
1924	39·3	1929	40·3	1934	42·7
1925	39·6	1930	40·5	1935	42·8

The following table, relating to male members of ordinary societies, which form the most important section of the total membership, shows very clearly, in another manner, the drift into the older age-groups:—

Age Groups.	1920.		1930.		1935.		1935 Members Distributed on Basis of 1920.
	No.	Per Cent.	No.	Per Cent.	No.	Per Cent.	
16-19 years	1605	7·79	1463	6·60	818	4·11	1551
20-29 years	5445	26·42	5117	23·08	3995	20·07	5259
30-49 years	9859	47·85	9613	43·37	8369	42·03	9528
50 years and over	3696	17·94	5975	26·95	6728	33·79	3572
Total Members whose Ages were specified	20,605	100·00	22,168	100·00	19,910	100·00	19,910

This increase in average age has an adverse effect on the financial stability of the societies.

Sickness and Mortality.

An improvement in sickness statistics was shown during 1935, the number of cases of sickness in adult male lodges being 5511 (5662), and the duration of sickness in days 340,631 (348,097), while the average length of sickness per case, 61·8 (61·5), remained practically stationary. In female lodges the cases of sickness fell to 312 (452), and the days of sickness to 17,493 (21,661), while the average length of sickness, per case, rose to 56·1 (47·9).

Details of sickness over the past six years are given in the following table:—

Year.	Cases of Sickness.	Total Duration.	Average Length of Sickness.	Sick Payments.	Sick Pay per Financial Member.
	No.	Days.	Days.	£	£ s. d.
1930	4769	310,299	65·1	34,243	1 6 10
1931	5589	346,867	62·1	34,596	1 8 7
1932	5294	358,600	67·7	34,103	1 9 2
1933	5372	361,341	67·3	33,658	1 9 4
1934	6114	369,758	60·5	35,439	1 11 1
1935	5823	358,124	61·5	33,898	1 9 0

During 1935 there were 308 (286) adult male deaths in friendly societies, 6 (10) females, and 1 (1) juvenile, making a total of 315 (297). The number of deaths of registered wives showed a marked increase, viz., 158 (132).

Funds.

Exclusive of dispensary stock, valued at £4329 (£4181), accumulated funds by the end of 1935 amounted to £455,363 (£447,328), and the capital per financial member was £19 9s. 6d. (£19 12s. 11d), and the rate of interest earned by the funds is 4·5 per cent (4·1 per cent.).

Receipts.

Net revenue for 1935 was £124,076, or £7777 greater than in the previous year, the chief items being members contributions and levies £87,359 (£84,633); interest, dividends, &c., £20,496 (£18,459); and miscellaneous items, £15,961 (£12,934).

Expenditure.

Of the net expenditure of £111,663 (£112,413), the greater part was distributed in payment of benefits for members, which totalled £85,357 (£82,763). These comprised £33,898 (£35,439) sick pay, £28,031 (£27,950) medical expenses, and £23,428 (£19,374) funeral donations. Of the remaining expenditure £18,057 (£18,079) represented cost of administration, and £8249 (£11,571) miscellaneous payments.

Further details under the several headings enumerated may be found on pp. 9 to 27.

In the previous report reference was made to the actuarial valuation of friendly societies then in progress. The report of the actuary was released recently, and copies have been distributed among the various societies affected. An abstract of the valuation follows this report, and is worthy of the most serious consideration by executives. It is confidently anticipated that when the seriousness of the position is realised the societies concerned will take immediate steps to set their finances in proper relation to the benefits contracted for. I have already commented upon the actuary's report, but should again like to impress upon executives the necessity of speedy action in the directions recommended by the actuary, Mr. A. M. Laughton.

For many years my predecessors and I have urged the amendment of the Friendly Societies Act of 1888, under which the societies function. Mr. Laughton says:

> "Fresh legislation is urgently required to bring the Act up to date. The Acts of the other States have been altered in many respects since 1888 with a view to improving the position of the societies and facilitating their operations."
>
> "It is desirable that alterations be made in many sections of the Act, and that new matter be introduced."

Mr. Laughton then proceeds to indicate some of the changes he considers should be made without delay. I heartily endorse his views, and trust that something may soon be done in this direction.

H. J. EXLEY,
Government Statistician and Deputy Commonwealth Statistician.

The Hon. the Attorney-General,
Hobart.

NOTE.—In years 1915 and 1916 the receipts include moneys which were found to be Trust Funds which should have appeared as transfers. The capital shows these funds (some £6000 in 1915 and £3725 in 1916) in duplicate, in addition to details shown in these two years respectively.

* Deducting cross entries, £1190 in 1905, £388 in 1906, £505 in 1907, £706 in 1908, £391 in 1909, £430 in 1910, £1334 in 1911, £706 in 1912, £1899 in 1913, and £1192 in 1914. In 1915 and onward for cross entries, see annual detail.

† Juvenile Lodges not included.

§ Capital of Lodges closed during year 1914, £45.

‖ Excluding value of Dispensary Stock on hand in 1913, £685; in 1914, £1588; in 1915, £1491; in 1916, £1744; in 1917, £1981; in 1918, £2403; in 1919, £2871; in 1920, £3060; in 1921, £3558; in 1922, £2986; in 1923, £3262; in 1924, £3526; in 1925, £3556; in 1926, £3750; in 1927, £3843; in 1928, £4287; in 1929, £4184; in 1930, £4529; in 1931, £4355; in 1932, £4184; in 1933, £4348; in 1934, £4181; in 1935, £4329.

‡ In 1920 and onward "Consolidated Sick Funds" and "Juvenile Funeral Funds," &c., which appear in earlier years in "Other Funds," are included in this column.
